# About us

Crypto trading is the process of speculating on cryptocurrency prices, and buying and selling them accordingly. Crypto traders typically use crypto exchanges such as eToro and Uphold. These are marketplaces where traders meet to track prices and make transactions.

Cryptocurrencies are generally used to pay for services or as speculative investments.

Cryptocurrencies are powered by a technology known as blockchain. Crypto prices are extremely volatile, and the industry is filled with uncertainty. We believe economic freedom is the foundation of peace and prosperity, and by creating more of it for people, we are reducing suffering in the world.

# Mission STATEMENT

# What is a crypto trade?

Cryptocurrency trading involves speculating on price movements via a CFD trading account, or buying and selling the underlying coins via an exchange. Here you'll find more information about cryptocurrency trading, how it works and what moves the markets.

# BEP20

BEP20 is a token standard on BNB Smart Chain (BSC). It is an extension of the Ethereum ERC-20 token standard, and it defines a set of rules that all BEP20 tokens must follow. These rules include how tokens can be transferred, burned, and minted.
